EXPERIENCE

Amazon

Senior Software Development Engineer 2026 – Present

Software Development Engineer II 2022 – 2026

Software Development Engineer I 2021 – 2022

- Engineer in the Fulfillment Technology organization, working across Authentication, User Lifecycle Management, Fulfillment Center Menus, and Labor Activity Tracking.
- Each of those areas owns at least one Tier 1 service — business critical, and cannot go down.

CPA to DEV

Founder 2024 – Present

- Write tutorials, tips, and tricks that help technology-focused accountants and CPAs move into software development — cpato.dev.

Order Post App LLC

Founder 2022 – 2023

The CORE Group

Accounting System Developer 2018 – 2021

- Developed, refined, and implemented the Connect platform — daniel-butler.com/work.
- Automated and digitized the accounting process end to end; when COVID hit, no one in the department needed to go to the office, and efficiency and accuracy both went up.
- Delivered greenfield projects for HR, Sales Admin, Operations, and Accounting staff.
- Rolled out, upgraded, and migrated the ERP and related ecosystem relied on organization-wide.
- Keynote speaker at the DocuPhase user conference on the work our team shipped on their platform.

Assistant Controller 2015 – 2018

- Managed an accounting department that grew from 4 to 13 people through a merger and acquisitions.
- Built five standard journal-entry macro spreadsheets that save 40 hours per month.
- Selected and trained alongside the VP of Finance on DocuPhase business process software.

Staff Accountant — HOPCO Foodservice 2013 – 2015

- Owned monthly journal entries, balance sheet reconciliation, and trial balance preparation.
- Managed \$1MM in annual corporate card spend and \$600k in fleet card spend.
- Negotiated office supply vendor selection, cutting \$2k per year off \$70k of spend.
